

# HUBWORLD AIDALON

## Preview Quick Start

## Symbols

- ♠ Shard
- ✎ Draw
- 🔥 Heat
- 🛡 Barrier
- 🔄 Presence
- Action
- ⚡ Instant
- ⚡ Reaction
- ⚡ Confront
- 👁 Discover

## Card Types

- 1 Shard Cost
- 2 Card Name
- 3 Ability Box
- 4 Collection Icons
- 5 Barrier Value
- 6 Card Type & Subtype
- 7 Presence Value
- 8 Limit Values (for the Refresh Phase)

**Source**  
*Economy and efficiency.*

1 2 **Tele-Mail Cluster**

➤ After this card is forged: Stage 1 card. (Agents, Sources, and Obstacles can be staged).

4

6 Source • Contraption 4

**Obstacle**  
*Defenses and traps.*

4 2 **Eye Enforcers**

🛡 Lose 14: Archive 1 card at random from engaged player's Council.

👁 If this card is in your grid, archive this card: Archive 2 cards at random from engaged player's Council.

5

5 Obstacle • Person 5 7

**Agent**  
*Powerful but vulnerable.*

3 3 **Gargala Larga**  
*Imperator of Growth*

👁 CIPHER — Engaged player exhausts their Seeker.

🔥 Exhaust this card: Unexhaust your Seeker.

4

4 Agent • Enforcer 4 7

**Moment**  
*Bursty one-time effects.*

0 3 **Smooth Handoff**

➤ Choose a player: They lose 1🔥 and draw 1 card.

3

3 Moment • Subterfuge 3 3

**Seeker**  
*Characters who guide playstyle.*

4 3 **Jayko & Ace**  
*Boisterous Troublemakers*

➤ As you approach a district, exhaust this card and gain 1♠. Gain 2🔥 and draw 1 card.

3

3 Seeker • Renegade 3 8

Sources, obstacles, and agents **can be staged** in your grid. To help you remember this, their art windows are below their ability boxes, unlike moments and seekers.

Single use cards that **cannot be staged** in your grid. Exiled after being played.

Placed in your seeker area during setup.

## Setup

- Each player does the following:
- Place your seeker card in your seeker area.
  - From the neutral bank, move 3 action tokens (➤) and 5 shard tokens (♠) to your token pool.
  - Shuffle your deck and place it in your Commons area. This is your Commons.
  - Draw 5 cards into your hand. This is your Council.
  - You may mulligan by setting aside (*facedown*) cards you don't want from your Council, drawing back up to 5, and shuffling the set-aside cards into your Commons.
  - Decide who takes the first player token. Whoever has this token is known as "the first player."
- Then proceed to the main phase (*see the next page*).

## Winning and Losing

You win if you secure 3 enemy agents in your score area (*each from a different player in games with 3+ players*) or if your rival tries to draw from their Commons while it is empty during the refresh phase.

## Card States

**Unforged**      **Forged**      **Unexhausted**      **Exhausted**

Cards are staged in your grid **unforged** (*facedown*). Later, you can forge the card by flipping it faceup and paying its shard cost (*see Instants on the next page*).

Cards are staged in your grid **unexhausted** (*upright*). Later, you may be able to exhaust the card by turning it sideways, showing it has been used for the round (*see the next page*).

## Terminology on Cards

- Adjacent:** If the edges of two cards are touching (*vertically or horizontally*), those cards are adjacent. Cards in positions diagonal to one another are not adjacent.
- Cipher:** To secure an agent with a Cipher ability, you must fulfill that Cipher's requirement. Cipher abilities are active in all game zones, including Archives.
- District:** Each player has 3 districts: Council (*hand*), Commons (*deck*), and Archives (*face-down discard*).
- Engaged:** Confronting and discovering are the two types of engagement. When you confront or discover a card, you become the engaged player.
- Path:** The vertical column of grid slots leading to each of the three districts.
- Rival:** The other player (*or the player to your left in games with 3+ players*).
- Row:** A horizontal row of grid slots: back (*closest to you*), middle, and front (*farthest from you*).
- Shift:** To shift a card, move it from its current grid slot to an adjacent (*non-diagonal*) grid slot. If there is already a card there, swap the two.
- Unexhaust:** The process of turning a card from an exhausted state to an unexhausted state.

# Round Structure

## 1. Main Phase

Starting with the first player and going clockwise, take turns performing 1 action from the list below (*spend* ➤ *in your pool to do so*). Repeat until all players have no ➤ remaining.

- : **Gain** 1 ♠ from the bank into your pool.
- : **Draw** 1 card from your Commons into your Council.
- : **Stage** an agent, obstacle, or source from your Council into a slot of your grid unforged and unexhausted (*do not pay its shard cost at this time*). If there is already a card in that grid slot, archive it if it's unforged or exile it if it's forged.
- : **Shift** a card in your grid to an adjacent (*non-diagonal*) grid slot. If there is already a card there, swap the two.
- : **Play** a moment with an ➤ ability (*pay its shard cost*).
- : **Use** an ➤ ability on one of your forged cards.
- : **Delve**. (See *Delving below*. Cannot delve first ➤ of the game.)

## 2. Refresh Phase

Once all players have spent all of their ➤, each player simultaneously does the following:

1. Reset to ➤➤➤ in your pool (*your seeker's action limit*).
2. Gain 1 ♠. If you have more than 10 ♠ in your pool (*your seeker's shard limit*), remove shards from your pool until you match the limit.
3. Draw 1 card (*if you can't because your Commons is empty, you lose*). If you have more than 5 cards in your Council (*your seeker's council limit*), archive cards from your Council until you match the limit.
4. Unexhaust each of your exhausted cards. (*Don't forget your seeker!*)
5. Pass the first player token to the player on your left. They are now 'the first player.'
6. The round ends. Start a new one.

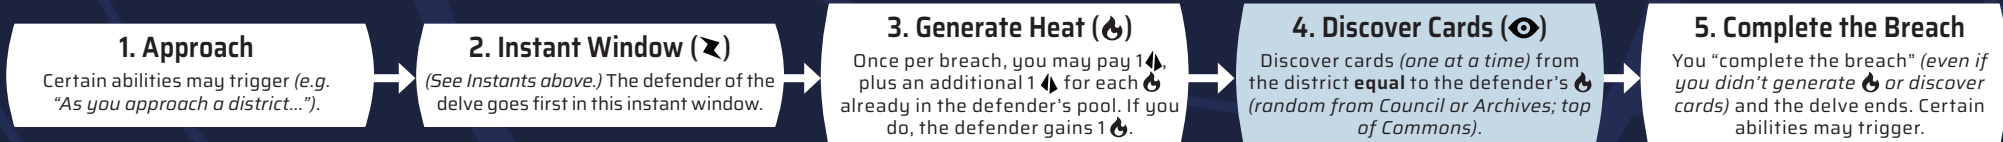

## Delving

You cannot delve as your first ➤ of the game (*for each player*). Delving is the main way you'll interact with your opponents' cards and secure their agents. When you delve, choose a **path** (*column*) in an enemy's grid that leads to one of their districts—**Commons**, **Council**, or **Archives**. Then, **encounter** each grid slot along that path (*one at a time, starting with the front row*) by following these steps below:

### Encountering a Grid Slot

### Breaching a District

## ⚡ Instants

At multiple points of the main phase, opportunities called 'instant windows' becomes available where players can perform instants. As a rule of thumb, if an action or ability is not resolving, an instant window is open. The four types of instants are:

- ⚡ : **Forge** an unforged card in your grid by flipping it faceup and paying its shard cost.
- ⚡ : **Collect** with your seeker or with a forged agent/source in your grid by exhausting it, then gaining a shard (♠) or drawing a card (🃏) for its corresponding collection icon.
- ⚡ : **Play** a moment with an ⚡ (*instant*) ability by paying its shard cost.
- ⚡ : **Use** an ⚡ ability on your seeker or on a forged card in your grid.

If multiple players want to perform instants at the same time, proceed as follows:

1. If the instant window is during a delve, start with the defending player (*the player whom the delve is targeting*), otherwise start with the first player.
2. That player performs as many instants as they'd like (*including none*). When they're done, the next player in clockwise order gets a turn to perform their instants.

This process continues indefinitely, with each player given a turn to perform as many instants as they'd like again and again. However, once all players consecutively pass their turn to perform instants, the instant window closes.

## 🔄 Reactions

Some cards have 🔄 (*reaction*) abilities that you can choose to use when the ability tells you. Just like instants, you can do as many 🔄 as you'd like. And if multiple players wish to use 🔄 at the same time, start with the first player outside of a delve or the defending player during a delve, then go clockwise.

## 🔍 Confronting Cards

During a delve, you might confront forged cards in the defending player's grid. When you do, first work your way down through the card's ⚡ (*confront*) abilities, then either break its ♠ (*barrier*) or end the delve. Finally, you may either break the card's 🌀 (*presence*) to secure/exile it or leave it be. The steps for confronting are:

1. Defender may trigger the card's ⚡ ability (*if any*).
2. If the card has a ♠, you may pay ♠ equal to the value to break it. If you don't, immediately end the delve.
3. You may pay ♠ equal to the card's 🌀 to break it.
  - If you do, secure the card if it's an agent, or exile it if it's an obstacle or source.
  - If you don't, leave the card alone (*return it to its previous place & state*).

## 👁 Discovering Cards

During a delve, you might discover cards either unforged in the defending player's grid or from inside one of their districts. When you do, first work your way down through the card's 👁 (*discover*) abilities, then either break the card's 🌀 to secure/exile it or return it to its previous place. In games with 3+ players, only you and the defending player look at the discovered card. The steps for discovering are:

1. Defender may trigger the card's 👁 ability (*if any*).
2. You may pay ♠ equal to the card's 🌀 to break it.
  - If you do, secure the card if it's an agent, or exile it if it's an obstacle or source.
  - If you don't, leave the card alone (*return it to its previous place & state*).

**NOTE:** When discovering a card in an Archives, you don't need to pay ♠ to secure it or exile it, but you do need to fulfill its Cipher keyword ability (*if any*).

## Securing Agents

Agents cannot go to the Exile. If you confront or discover an agent and break its 🌀, secure that agent to your score area (*instead of exiling it*). Additionally, if one of your agents would be exiled for any reason other than having its 🌀 broken, add it to your rival's score area (*the player to your left*).
